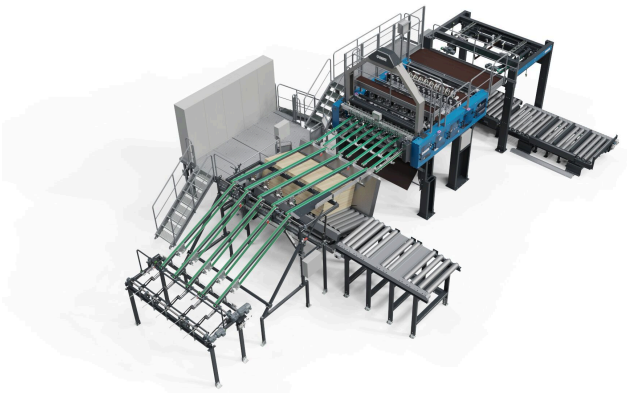
Green Veneer Composing Line R7



Automate the collection of randoms and compose them into full sheets with strong joints that don't break in drying. Analyzers maximize green veneer recovery.

BENEFITS

- Up to 5% better drying process efficiency through full sheet handling
- Only one operator needed
- Up to 4% better veneer recovery
- The strongest joints in the world

TECHNICAL DETAILS

	R7-5ft	R7-8ft
Veneer thickness (mm)	1,2 - 3,6	1,2 - 3,6
Operators on the Line	1	1
Installed power (kW)	60	70
Line Speed up to (m/min)	45	45
Capacity, (length meter/h)	390	375
Veneer Visual Analyzer R7 – Composing	●	●
Minimum random width (mm)	150	150
Composed sheet width (mm)	1000 - 4500	1000 - 2600
