The authorization would entitle the Board to acquire the Company's series A shares to be used for the development of the Company's capital structure, as consideration for funding or carrying out any acquisitions or other arrangements, or to be otherwise disposed of or cancelled.

The purchase consideration paid for shares purchased by virtue of the authorization shall be based on the price of the series A share in public trading so that the minimum price of acquired shares is the lowest market price quoted in public trading during the term of validity of the authorization and the maximum price, correspondingly, the highest market price quoted in public trading during the term of validity of the authorization.

The authorization includes the right to acquire shares other than in proportion to the holdings of the shareholders. A targeted repurchase of the Company's own shares can take place, for example, by acquiring shares in public trading in markets where, according to the regulations, the Company is permitted to engage in the trade of its own shares. The Board of Directors may decide to issue either new shares or company shares held by Raute. The maximum number of shares issued is 400,000 series A shares.

The Board proposes that the authorization include the right to deviate from the shareholders' pre-emptive rights, provided that the Company has a weighty financial

reason to do so. A targeted issue may be free only if a weighty financial reason exists in terms of the company, while also taking into account the interests of all of the shareholders. As proposed, the authorization can be used, with the restrictions presented above, to fund or carry out acquisitions or other arrangements or for other purposes decided by the Board of Directors.
