

Block Centering Analyzer R7 - Peeling

Analyzer with the most sophisticated XY centering and block optimization to ensure the best possible veneer recovery.

BENEFITS

- Increase veneer recovery up to 15 %
- Produce up to 20 % more face veneer
- Increase uptime with longer maintenance intervals
- Maximum production capacity
- Short payback time

TECHNICAL DETAILS

| | |
|--------------------------------|----------|
| Block Diameter (mm) | 140-1200 |
| Block Length (ft) | 5 - 10 |
| Centering Accuracy | ± 2mm |
| Block scanning up to (pcs/min) | 15-20 |
