

Veneer Drying Line R7

The most efficient and advanced veneer drying line in the industry.

BENEFITS

- Save 15% in energy consumption/m³ produced veneer
- Increase drying capacity by 10%
- Zero fugitive emissions
- Just one operator is needed to run this drying line

TECHNICAL DETAILS

Veneer thickness (mm)	0,6 - 4
Heat Energy Consumption (KWh/m ³ Dry Veneer)	400
Stainless Steel Skins	●
Drying Time (min)*	2.89
Make-up Air Valves	●
Smoke extraction cells	●
Sealant cells	●
Optimized heating system	●
Exhaust Air Blower	●
Misting System	●
Dry veneer capacity* up to (m ³ /h)	13,6
Installed power (kW)	595
