

Log Cutting Line R7

PERFECT FOR ANY LOG.

The fully automated and agile log cutting line

The Raute Log Cutting Line R7 is the most sophisticated and agile log cutting solution on the market. The pendulum saw makes cutting the various sized logs into desired size blocks possible, so this is the only cutting solution you need. It even comes with a block debarking which gives you the 2-in-1 solution to your veneer production process. This Log cutting line R7 is the one you want on your woodyard.

The Raute's Nordic design Log Cutting Line R7 is constructed with solid, high-quality parts and assured with years of knowledge and experience. The fully automated line gives you the maximum capacity of 10 logs with a maximum diameter of 800 mm per minute. For this line, it doesn't matter how long and how thick logs are fed to the line, this handles them all.

With Raute Log Cutting R7 you always know what you get.

Technical specifications

Operators on the Line	0
Block Cycle time up to (pcs)	13
Block length nom. (ft)	3 - 11

Log diameter (mm)	130 - 800
Log length up to (m)	15
Metal detector	●
3D scanner	●
X-ray	●
Debarker	●
Side product handling	●
Operating temperature	-40 - +40

Log Cutting

Log cutting solution to fit your need

Cutting logs - yes, the natural start of veneer production! But, how you do it depends on your needs.

Raute offers two different cutting station solutions: The Log Cutting Line R3 for small diameter logs and the Log Cutting Line R7 for any sized production. The R3 is the basic solution with two fitted saws for precise log cutting and the R7 comes with a pendulum saw for cutting any sized logs to the needed length. The R7 ensures the most agile cutting possibilities on the market.

Choose the one that fits your need!
