

## Panel Repair Station R5

# MAXIMIZE PRODUCTIVITY BY INTEGRATING NEW CAPACITY FOR EXISTING PROCESS

# Panel Repair Station R5 - for new and existing process

Raute Panel Repair Station R5 (patented) is the best solution for starting industrial panel repairing in a mill or adding new capacity to existing processes. This advantage is achieved through an easy investment as the Panel Repair Station R5 fits into the same space as a traditional manual repair cell would and no foundations are needed. Space-saving is reached by repairing panels directly in a stack on the topmost panel.

Panel repairing process using Raute Panel Repair Station R5 is cost-efficient by significantly reducing work hours and repair material. These savings are achieved with the most modern analyzer technology on the market, which allows optimizing the filling material usage.

Panel Repair Station R5 brings flexibility to your material flow in the mill as you can repair trimmed and un-trimmed panels with filling material of your choice.

Panel Repair Station R5 is a true labor saver as one operator can handle two stations simultaneously.
