

Panel Repairing Line R7

**UNCOMPROMISED REPAIRING
CAPACITY FOR MOST DEMANDING
NEEDS**

Uncompromised

Raute Panel Repairing Line R7 is the uncompromised panel repairing solution for most demanding needs. This line has the superior capacity and it can handle trimmed or untrimmed panels. Capacity is achieved through the combination of technology and the most modern analyzers on the market.

Repair technology allows the panel flow to be continuous, even 24/7, and the panels are repaired on the move. Multiple repair heads enable the usage of different repair materials and repair tools even on the same panel.

65% repair material saving is achieved by analyzing each panel surface carefully. Each panel is scanned and the repair of the defects found is optimized so that no over or under filling takes place.

Panel Repairing Line R7 is automatically controlled and monitored all the time and your production data is available in the industry's leading data capturing tool, MILLSIGHTS.

Key benefits

HIGH CAPACITY IS
ACHIEVED BY
REPAIRING THE
PANELS WHILE THEY
ARE MOVING

USES 65% LESS
REPAIRING
MATERIALS THAN
TRADITIONAL
REPAIRING METHODS

ONE OPERATOR
NEEDED
